

Command B

Integrated PIR detector for highbay applications

IP20

Command B Controller

Overview

Command B is a luminaire integrated PIR sensor to allow on/off functionality based on presence detection. The default settings can be over-riden using the hand-held controller if required, enabling energy saving in its simplest form. The Command B sensor is for supply with the Flight industrial product range and should be ordered using the relevant luminaire part code.

Features

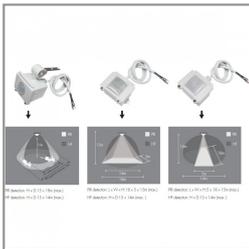

- Passive Infra Red (PIR) detector
- Maximum mounting height 15m
- Movement triggers 'on' signal
- Default hold-on time 35 minutes
- Default daylight switch off at 30 lux
- Supplied with 3 interchangeable lenses for wide, medium and spot detection zones
- For use with fixed output LED drivers only
- Settings can be over-riden by hand held controller (to be ordered separately)
