

Geopak™

The reusable packaging solution with GPS location tracking.

The packaging problem

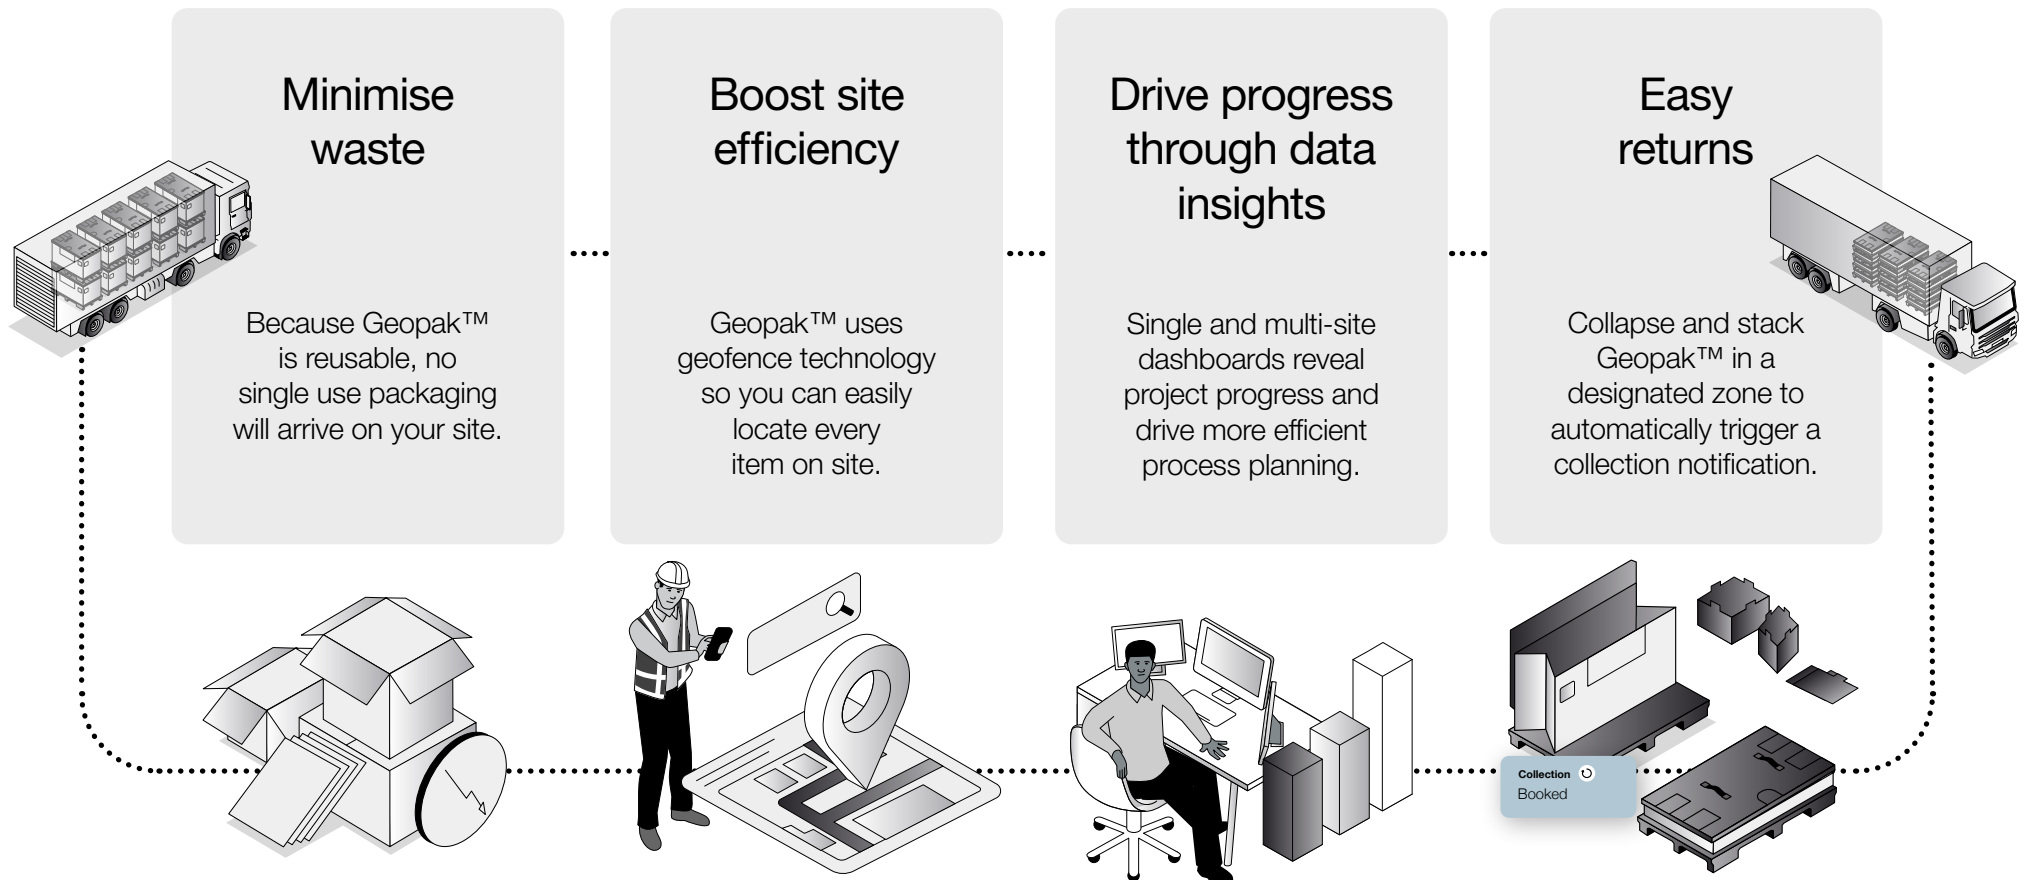

We all want less waste. And for many of our customers, hitting waste reduction targets can be essential to meeting investment criteria or sustainability accreditation standards. But the truth is, managing recycling on site is a challenge, with costly skips quickly filling with recyclable content like cardboard.

Whitecroft estimated less than 50% of its cardboard packaging material was being recycled after its products had been delivered on site.

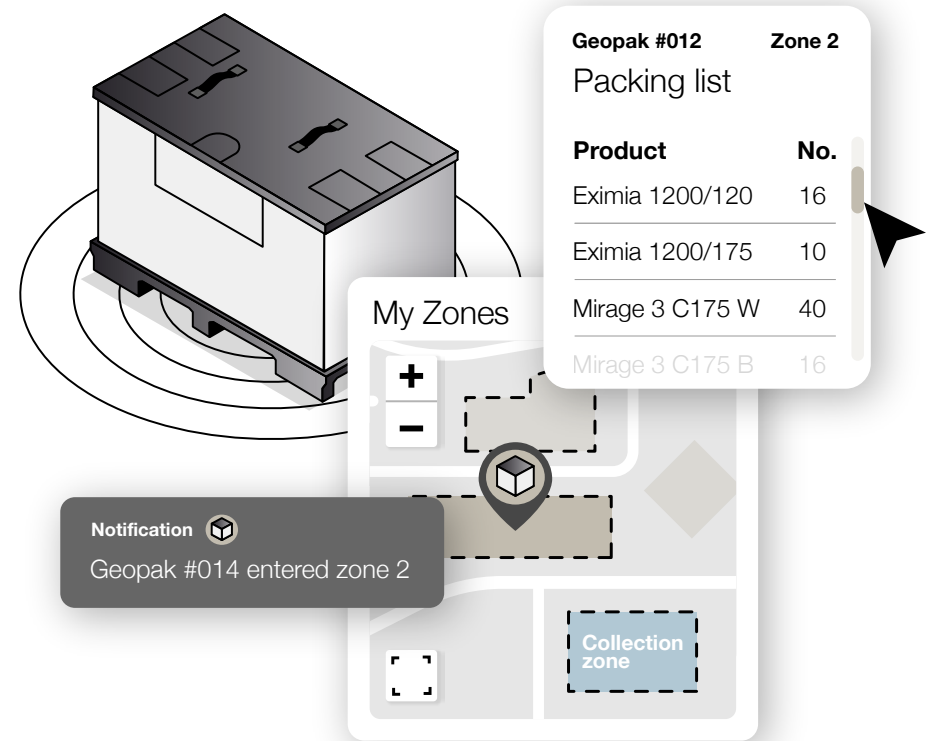

The solution is Geopak™

In collaboration with key partners, we developed a waste eliminating solution that meets the challenges of a busy modern site.

Plan, locate, optimise

- Easily define geofenced zones and direct deliveries according to location and work schedule for maximum site efficiency.
- Receive notifications when goods enter or leave a zone.
- Each Geopak™ comes with a digital packing list and product information.
- Locate the exact location of Item you need on site crate you need using the Geopak™ app.

Installer

Locate the exact product you need along with installation instructions via Geopak™ app.

Project manager

Full visibility of you project with snapshots of deliveries and returns.

Business manager

Multi-site dashboard with data insights that drive performance efficiency.
